

# Private Contractors

## **BUILDING, LANDSCAPERS, LAWN MAINTENANCE AND TREE TRIMMERS**

Private contractors are responsible for the removal of any waste they generate. Monthly sanitation fees do not include the removal of contractor generated waste and the City of Ocala is not responsible for its removal. Make sure your contract price includes the removal of any waste generated by your contractor and that your contractor removes such waste. Landscapers and lawn maintenance businesses may only place grass and other non-bulky yard waste out for collection at the curb with the owner's permission, provided such waste was generated solely from the ground where they provided that particular service.
